

Abstract

The present invention relates to compounds of the general formula I

wherein R^1 , R^2 , R' , R'' , n , m and o are defined herein, or a pharmaceutically acceptable salt thereof.

It has been found that the compounds of general formula I are adenosine receptor ligands with a good affinity to the A_{2A} -receptor and a high selectivity to the A_1 - and A_3 receptors. These compounds have useful pharmacological activities.
